# WORLD METEOROLOGICAL ORGANIZATION REGIONAL TRAINING CENTRE ITALY

WEATHER CLIMATE WATER

Connecting people to build  
knowledge and competencies in  
weather, water and climate services.

## OUR NUMBERS FROM 1999 TO 2020

29

COURSES

536

PARTICIPANTS

520

HOURS OF LESSON

### TRAINING FOCUS

The focus of the training courses:

- climate change and variability and their effects on natural resources and agriculture.
- sub-seasonal to seasonal forecast/predictions as a tool for water and agriculture management.
- agrometeorology and innovative solutions for climate-smart agriculture and food security.

### COURSES

#### • COURSES AND WORKSHOPS

Short-term training courses or workshops held in Italy and abroad, and long term stages (2 to 4 months) in the framework of long-term projects and collaborations.

#### • CUSTOM DESIGNED TRAINING

Domestic and international training activities designed on the basis of emerging training needs.

#### • eLEARNING

The Center develops online training packages widely accessible and designed to build Knowledge and Skills particularly in Climate Services field.

#### • TRAINERS

Highly qualified and experienced trainers: CNR scientists, faculty from other Institutions appointed on the basis of the course content.
