Enhancing Weather Communication:

the power of Live Streaming and Collaboration

Valentina Grasso - researcher and communication specialist

Giulio Betti, Claudio Tei, Bernardo Gozzini

Communication challenge

In today's digital landscape, video communication has emerged as a powerful tool for bridging the gap between scientific expertise and public understanding.

Classic weather-related videos often fall short in explaining the nuances of forecasts and the inherent uncertainty associated with them.

be followed BUT be accurate

a local service playing in the huge context of online comm

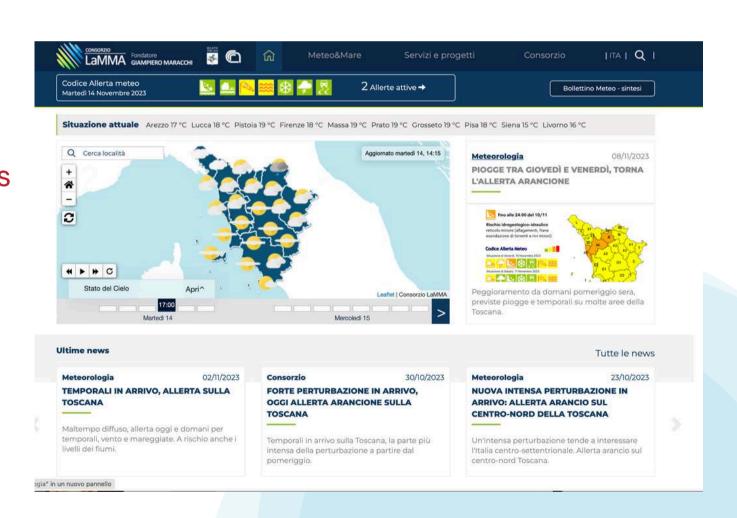

LaMMA is the public offical weather service of Tuscany region but with online forecasting services went national and mediterranean-wide

avg 150.000 page views/day peaks 550.000 pg views/day page views: 35 millions in 6 months

unique visitors: 8,5 millions in 6 months daily average: 47.000

coviD 19 stay connected

2019 NEW WESSITE

Boosting communication - video

Video to engage users and widening audience to a nationwide level.

- Have a regular weekly live-streaming appointment "LaMMA live"
- Combine a friendly approach with scientific accuracy
- Videos as **briefings** for media outlet gain **visibility**
- Expand social media presence
- Strengthen visual approach to content production Climate Reports

in house video production

LaMMA Live: on friday at 15.30

cross-streaming on Facebook:

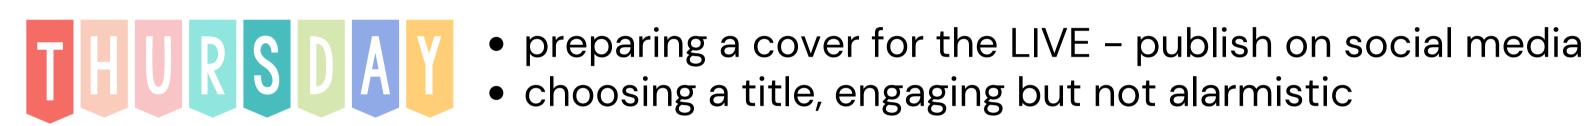

- CNR;
- Tuscany Region;
- lo Non Rischio Toscana
- In Toscana

COMUNICAZIONE SOCIAL

how we do it

- choosing a title, engaging but not alarmistic

- Friday morning prepare the slides to stream (GDrive)
- forecaster and communication discussion
- at 15.00 in the weather room short reharsal
- 15.30 LIVE around 10-15 minutes depending on issues
- questions and final remaks

- Social modifier
 - social media to share the youtube link

Meteo: Freddo e neve, da domenica arriv.

9.628 visualizzazioni • Trasmesso in streaming 4 giorni fa

La lunga fase autunnale e mite è destinata a lasciare spazio a condizioni più invernali a partire da domenica. Tornerà finalmente la neve in Appennino fino a quote medio basse e assisteremo ad un marcato calo delle temperature soprattutto al centro-nord e sulla Sardegna. Seguite la diretta VENERDÌ 5 gennaio alle 15:30
